

Join the Inorganic Division at Georgia Tech!

The Graduate Program in Inorganic Chemistry in the School of Chemistry and Biochemistry at the Georgia Institute of Technology encourages applications for Ph.D. studies in Fall 2024.

The core program includes organometallic, solid-state, bioinorganic, and coordination chemistry and deep expertise in spectroscopy and magnetism. The following groups are accepting students in the coming year:

Christoph Fahrni
Henry La Pierre
Joseph Sadighi
Jake Soper

Amit Reddi
Angus Wilkinson
Younan Xia
John Zhang

Related programs in Materials Science and Engineering, Physics, and Chemical and Biochemical Engineering also have openings and may, in consultation with the respective PI, accept students in their groups directly or as part of collaborations from the School of Chemistry and Biochemistry. These groups include those of:

Christopher Jones
Carsten Seivers
Martin Mourigal

Zhigang Jiang
Juan Pablo Correa
Lauren Garten

The deadline for priority consideration of your application is **December 1st, 2023**.

Informational Meeting
Thursday, Sept. 14, 2023
3:00 PM EST on Zoom

Register
Here!

This session will cover:

- the Chemistry Graduate Program at Georgia Tech
- our research infrastructure
- brief summaries of ongoing work in the Inorganic Division

There will also be an opportunity to meet faculty and current graduate students and make arrangements to have more detailed conversations in other forums.
